(a) Reconstruction
residual (value-cond.)
error-red. (fixed design)
local-variance (value-cond.)
Δ PCC vs feasible rule
budget (% of regions)
(b) ROI detection
vs permuted feedback
vs feasible rule
vs diversity sampler
Δ ROI recall of value-cond.
budget (% of regions)
(c) Spiked positive control
5% budget
10% budget
Δ PCC, residual − feasible
spike amplitude α
